

Renewable Energy Events at COP14 Poznan

| Date | Organisation | Title | Additional Information | Webcast Link | Contact |
|----------------------------|------------------------------------|------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| 02 Dec 2008 18:00-19:30 | Green Cross International (GCI) | <i>Unleashing the power of the sun: a call for a global solar fund</i> | GCI promotes the creation of the Global Solar Fund as a practical tool to engage business in fighting climate change. The fund is designed to make solar energy competitive with traditional energy sources. The conference aims to present the initiative and recruit allies in this new «solar venture». | To be provided | Adam Koniuszewski adam.koniuszewski@gci.ch +41 22 789 1662 |
| 03 Dec 2008 13:00-15:00 | Greenpeace International (GPI) | <i>The new energy revolution: a sustainable world energy outlook</i> | Greenpeace, Global Wind Energy Council, European Renewable Energy Council: a new scenario shows the energy sector changes needed to reduce CO2 and tackle climate change. Renewable energy, combined with energy efficiency and smart energy use can deliver half of the world's energy needs by 2050. | To be provided | Stephanie Tunmore stephanie.tunmore@uk.greenpeace.org +44 77 9694 7451 |
| 06 Dec 2008 18:00-19:00 | Fundacion Bariloche (FB) | <i>Clean energy access for urban poor - development and climate options</i> | The Global Network on Energy for Sustainable Development - GNESD - will present results of a study on clean energy access for urban poor. Centres in Africa, Asia and Latin America have analysed the situation in several cities including mega cities like Delhi, Buenos Aires, and Bangkok. | To be provided | Gustavo Nadal gnadal@fundacionbariloche.org.ar +54 2944 46 2500 |

| | | | | | |
|----------------------------|--------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|---------------------------------------------------------------------------------------------------------------|
| 05 Dec 2008 18:00-19:30 | Global Wind Energy Council (GWEC) | <i>Design options for a sectoral crediting mechanism for the power sector post-2012</i> | A presentation of studies by the Energy Research Institute (China) and the Oeko Institute (Germany) conducted for the Global Wind Energy Council and Greenpeace China, exploring the options, challenges and benefits of expanding carbon markets in developing countries. INFORSE & WECF: Successes to reduce poverty, new manuals for development solutions with less GHG in South Asia, sustainable energy visions/ scenarios for North. Exchange of views among NGOs, EECCA governments & UN on capacity building, role of women, tech. transfer, UNFCCC mechanisms, human rights. Co-organised by the International Renewable Energy Alliance: IGA, IHA, ISES, WWEA. | To be provided | Steve Sawyer angelika.pullen@gwec.net +32 502 5502 |
| 06 Dec 2008 18:00-19:30 | International Network for Sustainable Energy (INFORSE) | <i>Sustainable Energy & CC Policies: Poverty Reduction in Asia & EECCA. Zero Carbon Scenario in EU</i> | Renewable energies are a key for climate protection. The necessary financing tools for mobilising the shift towards renewable energy and conclusions for necessary changes within UNFCCC frameworks will be discussed. | To be provided | Gunnar Boye Olesen ove@inforse.org +45 86 22 7000 |
| 08 Dec 2008 19:30-21:00 | World Wind Energy Association (WWEA) | <i>Financing the renewable energy transition</i> | Staff from the African Development Bank, the Asian Development Bank and the European Investment Bank, along with a number of | To be provided | Stefan GsÄrnger sg@wwindea.org +49 228 369 4080 |
| 10 Dec 2008 13:00-15:00 | European Investment Bank (EIB) | <i>Clean energy, sustainable transport & natural resource</i> | | To be provided | Andrea Pinna a.pinna@eib.org +352 43 798 2554 |

| | | | | | |
|----------------------------|------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| 10 Dec 2008 18:00-19:30 | United Nations Industrial Development Organization (UNIDO) | <i>management in support of climate change police</i> <i>Energy efficiency in the post-2012 framework: key issues and challenges</i> | international experts, will explore the link between climate change and these sectors and provide examples of recent activities. An UN-Energy side event focusing on the role of energy efficiency in Climate Change mitigation and the development of industrial energy efficiency approaches in a post-2012 framework. Present the local government climate roadmap to the participants of COP 14, together with positions, opinions and demands of local government to national government in view of the post-2012 global climate agreement. Organised by ICLEI in cooperation with global LG partners. | To be provided | Marina Ploutakhina m.ploutakhina@unido.org +43 126 026 5051 |
| 10 Dec 2008 19:30-21:00 | ICLEI - Local Governments for Sustainability (ICLEI) | <i>Local government climate roadmap - Bali-Poznan-Copenhag en</i> | The IEA will present its latest work on climate-related policy & technology work including latest climate policy scenarios from the World Energy Outlook, the role of energy efficiency, technologies to 2050, & the carbon leakage issue. | To be provided | Gino Van Begin gino.van.begin@iclei.org +49 76 136 8920 |
| 10 Dec 2008 19:30-21:00 | International Energy Agency (IEA) | <i>You say you want a revolution - energy policy and technology for a sustainable future</i> | Europe and North Africa hold huge unused potentials for renewable energy. We will discuss the technical, financial and policy obstacles, the need for a super efficient grid | To be provided | Jenny Gell jenny.gell@iea.org +33 1 4057 6729 |
| 11 Dec 2008 13:00-15:00 | European Climate Forum (ECF) | <i>The SuperSmart Grid - securing clean energy and prosperity for Europe and</i> | | To be provided | Antonella Battaglini antonella@european-climate-forum.net +49 33 1288 2670 |

| | | | | | |
|----------------------------|-----------------------------------------------------------|------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|---------------------------------------------------------------------------------------------------------------|
| 11 Dec 2008 13:00-15:00 | Denmark | beyond.(with e-Parliament) | connecting all parts of the Europe-Mediterranean region, and how legislators can promote a carbon-free electricity system. | To be provided | Sune Thorvildsen sutho@kemin.dk +45 2285 2948 |
| 11 Dec 2008 18:00-19:30 | Centre for Science and Environment (CSE) | IRENA - promoting renewable energy for a stable climate | High-level-event to promote IRENA at the United Nations Climate Change Conference in Poznan. The CSE and HBF joint side-event will focus on policies to accelerate the installation of renewable energy projects in the industrialising nations. The equity debate in climate change has undergone several changes. We present new analysis on the issue and discuss and critiquing the new methods | To be provided | Pradip Saha prosaha@gmail.com |
| 11 Dec 2008 19:30-21:00 | UNICA - Brazilian Sugarcane Industry Association* (UNICA) | Transition to renewables: need for equity-based framework | Through production and consumption of sugarcane ethanol developing nations can mitigate climate change effects while enhancing economic growth and energy security. Renowned specialists will debate the impacts of bioethanol on land-use change, food prices, environmental benefits and sustainability. | To be provided | Carolina Costa carolina@unica.com.br +55 11 3093 4949 |

| | | | | | |
|----------------------------|-------------------------------------------|--------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|----------------------------------------------------------------------------------------------------------------|
| 11 Dec 2008 19:30-21:00 | Italy | <i>Bioenergy towards a low carbon future: meeting the challenges of sustainable development and climate</i> | Presentation of the results of the first biennium activity of the Global Bioenergy Partnership (GBEP) and in particular will focus on the dissemination and discussion of the achievements and way forward of the two task forces established within GBEP. | To be provided | Corrado Clini pia-sdg@minambiente.it +39 06 5722 8163 |
| 11 Dec 2008 19:30-21:00 | The Energy and Resources Institute (TERI) | <i>Low carbon pathways: challenges and technological options for India</i> | India is seen as a responsible emerging nation. To fulfil its responsibility in context of Climate Change; technological & financial mechanisms to enable it being at par with developed world need to be defined. Event will focus on options & challenges posed to economic growth, energy security & SD. | To be provided | Prabhat Upadhyaya prabhat@teri.res.in +91 112 468 2100 |
